## Shape, Space & Measures

Name: \_\_\_\_\_

*By the end of Year 2...*

To understand the properties of shapes		I can identify and describe the properties of <b>2-D shapes</b> , including the number of sides and the number of corners. ( <i>polygons and quadrilaterals</i> )
		I can identify and describe the properties of <b>3-D shapes</b> , including the number of edges, vertices and faces. ( <i>cuboids, prisms and cones</i> )
		I can identify vertical <b>lines of symmetry in 2-D shapes</b> .
		I can draw a 2D shape using a <b>straight edge</b> .
		I can name 2-D shapes on the <b>surface (face)</b> of 3-D shapes.
		I can compare and sort common 2-D and 3-D shapes and everyday objects.
To describe position, direction and movement		I can use mathematical vocabulary to describe <b>position, direction and movement</b> : - movement in a straight line; - rotation as a turn and in terms of right angles for quarter, half and three-quarter turns (clockwise and anticlockwise).
		I can order and arrange combinations of mathematical objects in <b>patterns and sequences</b> .
To use measures		I can use <b>measuring apparatus</b> , such as rulers, scales, thermometers and measuring vessels, to measure the following to the nearest appropriate unit: - length/height in cm/m - mass in kg/g - temperature in °C - capacity in ml/l.
		I can use <b>&gt;, &lt; and =</b> to compare and order <b>lengths, mass and volume/capacity</b> .
		I recognise and use the symbols <b>£ (pounds) and p (pence)</b> .
		I can <b>combine amounts</b> to make particular values
		I can find <b>different combinations of coins</b> that equal the same amount of money.
		I can <b>count and recognise coins</b> .
		I can solve simple and practical <b>addition and subtraction problems involving money</b> of the same unit, including giving change.
		I know the number of <b>minutes in an hour</b> and the number of <b>hours in a day</b> .
		I can compare and sequence <b>intervals of time</b> .
		I can tell and write the <b>time to five minutes</b> and <b>draw the hands on a clock face</b> to show these times. ( <i>including quarter past/to the hour</i> )
To use statistics		I can interpret and construct simple <b>pictograms, tally charts, block diagrams and simple tables</b> .
		I can ask and answer simple questions by <b>counting the number of objects in each category and sorting the categories by quantity</b> .
		I can ask and answer questions about <b>totalling and comparing categorical data</b> . ( <i>most common and least popular</i> )
